ABOUT ME

Full Stack Developer with 2 years of experience specializing in the MERN Stack (MongoDB, Express.js, React, Node.js). Proficient in building scalable, responsive web applications using React, Next.js, and TypeScript, along with developing backend APIs using Node.js and Express. Skilled in designing RESTful services, managing databases with MongoDB, and integrating frontend and backend systems. Experienced in Agile development, cross-team collaboration, and delivering efficient, user-focused solutions. Seeking a challenging role to contribute and grow in a dynamic full-stack MERN development environment.

WORK EXPERIENCE

PIEST SYSTEMS OPC PVT LTD

Software Developer May 2024– Continued

PROJECTS 01: PIEDUET – LMS WEB APPLICATION

FULL-STACK LEARNING MANAGEMENT SYSTEM (MERN STACK)

Pieduet LMS is a full-stack Learning Management System built using the MERN stack (MongoDB, Express.js, React/Next.js, Node.js). It delivers a seamless online learning experience with a clean UI and efficient backend architecture, ensuring smooth course management for students, educators, and administrators.

Key Features:

- User Authentication & Authorization:
 - Implemented secure JWT-based authentication (login, signup, role-based access) using Node.js, Express.js, and MongoDB, while integrating the frontend with React/Next.js for seamless protected route handling.
- Responsive UI/UX:
 - Developed a fully responsive, intuitive interface using React/Next.js and Tailwind CSS, ensuring smooth performance across all devices.
- State Management:
 - Used Redux Toolkit for state management to maintain a predictable global store and enable efficient communication between components.
- REST API Integration:
 - Built RESTful APIs using Express.js, connected them to MongoDB using Mongoose, and consumed the APIs on the frontend with Axios for courses, progress tracking, and user data.
- Modular Component Architecture:
 - Implemented reusable UI components (React) and modular backend controllers, routes, and services to enhance scalability and maintainability.
- Performance Optimization:
 - Used lazy loading, code splitting, and server-side rendering (Next.js) to improve loading speed and overall user performance.
- Security Measures:
 - Ensured secure data flow with:
 - JWT authentication
 - Password hashing with bcrypt
 - Protected API routes
 - Validation of request bodies and sanitization

My Contributions :

- Led the frontend and backend integration, building core modules using React/Next.js on the frontend and Node.js + Express.js + MongoDB on the backend.
- Designed and implemented REST APIs, database schemas, and authentication flows.
- Set up the project structure, architecture, and folder organization for both frontend and backend.
- Integrated frontend with backend APIs using Axios and Redux Toolkit.
- Collaborated with team members to define API contracts, database models, and deployment strategies.
- Performed code reviews, optimized performance, and ensured adherence to MERN best practices.
- Participated in sprint meetings, helped plan features, solve blockers, and improve the development workflow.

PROJECTS 02 : PIEDUET ADMIN PANEL

ADMIN DASHBOARD FOR MANAGING LMS CONTENT, USERS & COURSES (MERN STACK)

Overview :

The Pieduet Admin Panel is a full-stack admin dashboard built using the MERN stack to manage and monitor all backend operations of the Pieduet Learning Management System. It provides administrators with complete control over users, courses, modules, progress, announcements, and system activities. The platform follows a secure and scalable API-driven architecture using Node.js, Express.js, and MongoDB, with a clean and responsive UI built using React/Next.js and Tailwind CSS.

Key Features:

- Course & Module Management:
 - Full CRUD operations for courses, modules, lessons, and materials.
- User Management (Admins, Teachers, Students) :
 - Add, update, disable, or delete users with role-based access control.
- Dashboard Insights :
 - View analytics such as:
 - Active users
 - Course enrollments
 - User progress
 - System activity logs
- Content Moderation
 - Control all LMS content: materials, assignments, quizzes, and announcements.
- Notifications & Announcements:
 - Push notifications and broadcast messages to students or instructors.
- Secure Authentication:
 - JWT-based admin login with protected routes and token validation.
- REST API Architecture:
 - Built with Express.js controllers, services, middleware, and MongoDB models.

My Contributions :

- Developed the backend API architecture using Node.js, Express.js, and MongoDB with modular controllers, services, and validation layers.
- Built admin screens using React/Next.js with Tailwind CSS for clean UI and UX.
- Implemented JWT authentication, admin authorization, and middleware for secure access.
- Integrated APIs with Axios and maintained application-wide state using Redux Toolkit.
- Created reusable components for tables, forms, modals, and filters to ensure scalability.
- Worked closely with the LMS team to integrate course, user, and dashboard APIs.
- Performed API testing with Postman and maintained Git version control.

Projects 03 : Pievcore – EFORUM Website

Educational Forum & Learning Platform (MERN Stack)

Overview :

The Pievcore Website is a full-featured educational forum platform developed using the MERN stack, designed to help students and professionals share knowledge, post questions, discuss ideas, participate in polls, and engage in real-time conversations. The platform provides a smooth and interactive learning experience with secure authentication, responsive UI, and seamless backend operations.

Key Features :

- Question & Answer System
 - Users can post questions, give answers, like/dislike responses, and mark best answers.
- Idea Posting
 - A dedicated section where students can share tech ideas, project concepts, and innovations.
- Poll Creation & Voting
 - Users can create polls and vote on multiple topics with live results.
- E-News Updates
 - Stay informed with the latest tech news, industry trends, and educational updates curated for learners and professionals.
- Jobs & Opportunities
 - Explore verified job openings, internships, and career opportunities tailored for students, freshers, and working professionals.
- Real-Time Chat System
 - Integrated Socket.io chat for real-time discussions and community engagement.
- User Profiles
 - Manage personal details, avatar, activity history, and posted content.
- Tag & Category Management
 - Organized content discovery using tags, categories, and trending topics.

- Notifications
 - Real-time alerts for likes, replies, followers, and system updates.
- Secure Authentication
 - Implemented JWT authentication with role-based permissions and protected routes.
- Optimized Performance
 - Lazy loading, pagination, server-side rendering, and optimized API requests.

My Contributions :

- Developed the frontend using React/Next.js, achieving a clean, responsive, and SEO-friendly interface.
- Designed and implemented REST APIs using Node.js and Express.js with modular architecture.
- Built database schemas and relationships using MongoDB/Mongoose for users, posts, ideas, polls, chats, and notifications.
- Integrated JWT authentication and protected routes for secure actions and user access levels.
- Implemented features such as polls, idea sharing, chat system, follow/unfollow, content moderation, and user activity logs.
- Worked with Axios to connect frontend and backend, managing state using Redux Toolkit.
- Ensured UI/UX consistency using Tailwind CSS and reusable components.
- Performed API testing using Postman and managed the codebase via Git & GitHub.

Projects 04 : Pievcore Admin Panel

Admin Dashboard for Managing Forum Content & Users (MERN Stack)

Overview :

The Pievcore Admin Panel is a full-stack admin management system built using the MERN stack to control and moderate all activities within the Pievcore E-Forum platform. It enables administrators to manage questions, answers, ideas, users, jobs, e-news, tags, categories, notifications, and real-time chat—all through a secure, scalable dashboard.

The system uses a modular REST API architecture powered by Node.js, Express.js, and MongoDB, combined with a responsive admin UI developed using React/Next.js and Redux Toolkit.

Key Features

- Forum Content Moderation
 - Admins can manage all user-generated content (Questions, Answers, Ideas) with full CRUD operations.
- Real-Time Chat Monitoring
 - Monitor and manage community chat rooms through Socket.io Admin integration.
- User & Profile Management
 - Create, update, restrict, or delete user accounts with complete admin-level controls.
- Tag & Category Management
 - CRUD capabilities for managing forum tags, categories, and topic structures.
- E-News Management
 - Create and manage educational news posts published on the main Pievcore platform.
- Job & Career Postings
 - Admins can add, update, and verify job and internship listings.
- Push Notifications
 - Send instant announcements, approvals, and alerts to users directly from the dashboard.
- Role-Based Access Control
 - JWT authentication with customized admin roles (Moderator, Super Admin, Editor, etc.).
- REST API Architecture
 - Backend built using Express.js controllers, middleware, Mongoose models, and modular APIs for scalability.
- Admin Dashboard Overview
 - Real-time analytics for user activity, content count, reports, and system insights.

My Contributions

- Led both frontend and backend integration, building core modules with React/Next.js and Node.js + Express.js + MongoDB.
- Designed and implemented REST APIs, backend controllers, middleware, MongoDB schemas, and authentication flows.
- Set up overall project structure, routing, folder architecture, and reusable service layers.
- Integrated frontend with backend using Axios + Redux Toolkit, ensuring smooth state management.
- Built admin modules for content moderation, user management, tags/categories, jobs, and e-news.
- Implemented JWT authentication, role-based authorization, and secure protected routes.
- Performed code reviews, optimized API performance, and enforced MERN best practices.
- Collaborated with team members on database models, API contracts, UI logic, and deployment strategies.
- Participated in sprint planning, resolved blockers, and improved development workflows.

Full-Stack Development Skills :

- Frontend Development
 - HTML5, CSS3, JavaScript (ES6+), TypeScript
 - React.js, Next.js
 - State Management: Redux Toolkit, Context API
 - UI Styling: Tailwind CSS, Responsive Design, Component Architecture
 - Frontend Optimization: Code Splitting, Lazy Loading, Performance Tuning
 - Form Handling: Form Validation, Controlled/Uncontrolled Components
- Backend Development
 - Node.js, Express.js (REST APIs, Middleware, Authentication)
 - MVC Architecture
 - API Development: CRUD operations, Data Validation, Role-Based Access
 - Real-Time Features: WebSocket (Chat), Notifications, Events
 - Database & Storage
 - MongoDB (Mongoose)
 - Schema design
 - Authentication data handling & indexing for performance
- DevOps, Tools & Workflow
 - Git, GitHub, Git Flow
 - Postman – API Testing
 - VS Code
 - Environment Variables, Debugging, API Documentation
 - Full-Stack Integration
 - API integration with frontend (Axios, Fetch)
 - Secure Authentication & Authorization (JWT, Cookies, Middleware)
 - Component Reusability & Scalable Architecture
 - Deployment knowledge (Vercel, Cloud hosting basics)
- Additional Skills
 - Performance Optimization
 - Clean Code Practices
 - Reusable Components & Modular Architecture
 - Problem Solving & Debugging
 - Team Collaboration (Sprint-based development)

Education :

- B.Tech : Computer Science Engineering : Biju Patnaik University of Technology – 2019–2022
- Diploma : Information Technology : Govt. Polytechnic Bhubaneswar – 2016–2018
- I.T.I – COE (IT) : Govt. I.T.I Bhubaneswar – 2013–2015
- 10th : Ram Krishna Mission Vivekananda High School – 2012–2013

Personal Details :

- Name : P Jagdish Rao
- Father Name : P Kameswar Rao
- Marital Status : Unmarried
- Date of Birth : 12/03/1997
- Gender : Male
- Nationality : Indian
- Language : English, Hindi, Telugu, Odia

I hereby declare that the above-written particulars are true to the best of my knowledge and belief.

Date :

Place : Bengaluru
