PROFESSIONAL EXPERIENCE

Piest Systems OPC .Pvt .Ltd - Software Engineer
Pieduet Web Application (A Online LMS Project)

May 2024-Continuing
Bellandur, Bengaluru

- **Developed from Scratch** : Involved from the initial phase, building the project architecture and front-end structure using Next.js (React framework) with TypeScript.
- **UI/UX Implementation with Tailwind CSS** : Created responsive and modern interfaces using Tailwind CSS, ensuring consistent styling across components and enhancing the user experience.
- **State Management using Redux Toolkit** : Managed global states efficiently using Redux Toolkit, optimizing user authentication flow, form states, and interactive components.
- **API Integration with Axios** : Integrated frontend with Node.js backend APIs using Axios, handling secure user data fetching, form submissions, and real-time content rendering.
- **Authentication & Session Management** : Implemented user authentication flows (login, registration, protected routes) with token management, integrating Redux and Axios interceptors.
- **Modular Component Architecture** : Built reusable, maintainable components adhering to clean code principles and best practices for scalability.
- **Performance Optimization** : Applied lazy loading, code splitting, and minimized re-renders to improve overall page performance and loading time.
- **Version Control with Git** : Used Git & GitHub for version control, collaborating with the team and handling feature branches and pull requests.
